Color Palette

Every color, hex value, and when to use it

01

Color - Primary Palette

The warm-earth tones that define Lyzr. Used for buttons, navigation, headings, logos, and all key interactive states. Use exact hex codes — never approximate or substitute.

#6B4C4C Deep Mahogany CTA buttons · logo mark	#8A6060 Warm Mauve Hover states · secondary	#160F0B Near Black Hero & dark backgrounds	#1E1610 Dark Espresso Dark panels · footer
--	--	---	---

Secondary Palette — Warm Neutrals

Light-mode canvas: backgrounds, card surfaces, and dividers.

#EBE5DC Warm Linen Main page background	#F2EDE8 Cream Cards · nav glass	#F9F5F1 Parchment Hover · tag surfaces	#D4CBC0 Warm Border Borders · dividers
--	--	---	---

Shade Scale Preview

Each base color has a full 50–800 shade scale. Shown below — use tints for backgrounds and deep shades for text on light.

Color - Accent Palette

Use sparingly. Accents appear only in italic emphasis, badges, active states, and live indicators. They should never dominate a layout. All colors must be matte — overly vibrant or washed-out are not allowed.

#C96A5A Dusty Rose Accent · badge · CTA	#2A1F1A Ink Deep All body text on light	#7A6A60 Warm Muted Sub-text · captions
#4ADE80 Sage Green Live status · success	#622B0F Burnt Sienna Deep hover · dark accent	#1F0F08 Deep Brown Warmest near-black alt

Alert & Notification Colors

Four semantic alert colors — used exclusively for status messages, system alerts, and feedback components. Never swap for decorative purposes.

INFO #3B82F6 · Information & tips	SUCCESS #16A34A · Confirmed & live	WARNING #D97706 · Caution & limits	ERROR #DC2626 · Failed & blocked
---	--	--	--

Color -

The 60-30-10 Rule

Every Lyzr page uses this ratio. It prevents any single color from overwhelming the layout and creates visual hierarchy naturally. This is a starting point, not a rigid law — adapt for complex layouts, but always test for accessibility.

Light Mode (Default)

Dark Mode (Alternate)

60%

Neutral Foundation

Page backgrounds, card surfaces, and section fills. The canvas of every page.

- #EBE5DC
- #F2EDE8
- #F9F5F1

30%

Brand Identity

Navigation, CTA buttons, rule bars, logo marks, and section titles.

- #6B4C4C
- #8A6060
- #1E1610

10%

Accents Only

Italic highlights, badges, live indicators, body text. Never large fills.

- #C96A5A
- #4ADE80
- #2A1F1A

Color - WCAG 2.2 Contrast Reference

All ratios calculated using the WCAG 2.2 relative luminance formula. AA requires 4.5:1 for normal text. AAA requires 7:1. Never use a "Large only" pairing for body text.

COLOR PAIRING	RATIO	LEVEL	WHERE TO USE IT
White on #160F0B Near Black	18.97:1	AAA	Hero headings and nav logo — maximum contrast
White 50% on Near Black	5.31:1	AA	Hero subtitle and body text on dark backgrounds
#F0E8E4 on Dark Espresso	14.75:1	AAA	All body text on dark section backgrounds
#2A1F1A Ink on White	16.04:1	AAA	Primary body text on white — highest contrast
#2A1F1A Ink on Warm Linen	12.81:1	AAA	Primary body text on #EBE5DC main background
#6B4C4C Mahogany on White	7.60:1	AAA	Mahogany links and accents on white
#6B4C4C Mahogany on Warm Linen	6.07:1	AA	Mahogany headings and CTAs on page background
#C96A5A Rose on Near Black	5.14:1	AA	Dusty Rose on dark — badge text, italic accents
#7A6A60 Muted on White	5.17:1	AA	Sub-text, captions, and metadata on white
#4ADE80 Green on Near Black	10.88:1	AAA	Sage Green live status on dark — strong AAA

Typography

Two fonts — Playfair Display & DM Sans — and how to use them

02

Typography - Fonts

Brand Font — Playfair Display

For headings and display text only. Weight 300 Light always. Letter-spacing -0.03em on headings. Italic accent uses Dusty Rose #C96A5A. Never use Bold weight.

- Hero H1: 4.4-5.4rem · weight 300 · line-height 1.05
- Section H2: 2.6-3.6rem · weight 300 · line-height 1.10
- Card H3: 1.85-2.3rem · weight 400 · line-height 1.15

Secondary Font — DM Sans

For all functional text: body copy, buttons, labels, captions, tables, and UI elements. Inter as fallback where DM Sans is unavailable.

- Body: 15-16px · weight 400 · line-height 1.88
- UI Eyebrow: 10-11px · weight 600 · UPPERCASE · letter-spacing +0.22em
- Button: 13-14px · weight 500 · never uppercase or bold
- Caption: 10-11px · weight 400 · line-height 1.40

LINE SPACING RULES

Headings: **115%-130%**

Paragraphs: **130%-150%**

All Caps: **115%-125%**

Never letter-space body text.

Font Files

Typography - Type Scale

Every level of the type hierarchy defined. Always pick from this scale — never use in-between sizes.

LEVEL	SIZE	WEIGHT	FONT	GUIDELINES & USAGE
Hero H1	4.4–5.4rem	300	Playfair Display	Main hero headline — one per page. line-height 1.05 · letter-spacing -0.03em. Italic phrase in Dusty Rose as accent.
Section H2	2.6–3.6rem	300	Playfair Display	Major section headings. line-height 1.10 · letter-spacing -0.03em. Never use bold weight.
Card H3	1.85–2.3rem	400	Playfair Display	Card headings, article sub-sections. line-height 1.15 · letter-spacing -0.02em.
Body Lead	17.5px	300	DM Sans	First paragraph or hero sub-text. line-height 1.90 · No letter-spacing.
Body Copy	15–16px	400	DM Sans	All standard paragraphs and card body text. line-height 1.88 · No letter-spacing.
UI Eyebrow	10–11px	600	DM Sans	Section eyebrow labels — ALWAYS uppercase. letter-spacing +0.22em. Never mixed case.
Button	13–14px	500	DM Sans	Button text — never uppercase, never bold. letter-spacing +0.02em.
Caption	10–11px	400	DM Sans	Dates, author names, tooltip text. line-height 1.40 · letter-spacing +0.01em.
Badge / Tag	9–10px	700	DM Sans	Status tags and chips — ALWAYS uppercase. letter-spacing +0.16em.

Typography - Web Type Scale

Two modular scales for the website — sourced from typescale.com . Both use a 16px base. Use **Major Third** for marketing / landing pages where headings need impact. Use **Minor Third** for product UI and blog where dense content demands a tighter hierarchy.

Major Third ratio: 1.250 Marketing · Landing pages			
STEP	PX	REM	USAGE
4xl	61.04px	3.815rem	Hero H1 — one per page
3xl	48.83px	3.052rem	Section H2
2xl	39.06px	2.441rem	Card / Feature H3
xl	31.25px	1.953rem	Sub-section H4
lg	25.00px	1.563rem	Lead / Intro text
md	20.00px	1.250rem	Large body / UI label
base	16.00px	1.000rem	Body copy — base
sm	12.80px	0.800rem	Caption / metadata
xs	10.24px	0.640rem	Badge / eyebrow label

Minor Third ratio: 1.200 Product UI · Blog · Docs			
STEP	PX	REM	USAGE
4xl	47.78px	2.986rem	Page title / H1
3xl	39.81px	2.488rem	Section H2
2xl	33.18px	2.074rem	Card / Feature H3
xl	27.65px	1.728rem	Sub-section H4
lg	23.04px	1.440rem	Lead / Intro text
md	19.20px	1.200rem	Large body / UI label
base	16.00px	1.000rem	Body copy — base
sm	13.33px	0.833rem	Caption / metadata
xs	11.11px	0.694rem	Badge / eyebrow label

MAJOR THIRD — VISUAL PREVIEW

Feature Highlights

Deploy production-ready agents at enterprise scale.

Caption text · metadata · timestamps

Themes

Dark & Light — exact tokens for both environments

03

Themes - Dark Theme

Default for hero sections, landing pages, and product showcases. Use data-theme="dark" to apply all tokens below automatically.

Design Tokens

TOKEN	VALUE	CONTROLS
--bg0	 #160F0B	Page & hero background
--bg1	 #1E1610	Dark content sections, footer
--bg2	 #261A15	Card surfaces, panels
--fg	 #F0E8E4	All text on dark
--fg2	rgba(240,232,228,.65)	Descriptions, metadata
--accent	 #C96A5A	CTA buttons, italic accents
--border	rgba(255,255,255,.07)	Card borders on dark
--green	hsl(140,55%,50%)	Live status dot — pulse 2.4s

Themes - Light Theme

Used for content pages, blog, features, and application interfaces. Optimised for readability and extended reading sessions.

ENTERPRISE AI PLATFORM

Build AI Agents that *Actually Work*

Deploy AI agents with enterprise-grade reliability.

Design Tokens

TOKEN	VALUE	CONTROLS
--bg0	 #FFFFFF	Pure white, maximum readability
--bg2	 #F2EDE8	Card fills, warm panel backgrounds
--border	 #D4CBC0	All borders and dividers
--fg	 #2A1F1A	All text on light
--fg2	rgba(42,31,26,.55)	Secondary text, captions
--accent	 #6B4C4C	Links, active nav, CTAs
--accent2	 #8A6060	Hover state for all interactive
--green	hsl(140,50%,38%)	Live status — darker for contrast

Icons

Style, size, color, and context

04

Icons - Style & Usage

All icons use Lucide React — line-art stroke, never solid fills. Rounded caps and joins. Color inherits via `stroke="currentColor"` . Highlighted icon **CPU ★** demonstrates engineering-context fill with Dusty Rose.

PROPERTY	VALUE	WHY IT MATTERS
Style	<code>fill="none" stroke="currentColor"</code>	Line art only. Inherits color from context automatically.
Stroke width	1.5px default · 2.0px arrow · 2.2px check	Consistent weight. Directional icons use heavier stroke.
Default size	14px buttons · 20px UI · 26px containers	Never scale beyond 26px in body content.
Active / engineering	#C96A5A Dusty Rose	Selected, highlighted, or engineering-context icons only.
Container	44×44px · radius 7px · bg rgba(107,76,76,.12)	Used in feature rows across all pages.

Background Ladder

Section backgrounds and text pairing rules

05

Background - Background Ladder

A deliberate sequence of section backgrounds across a page. Alternating values create visual rhythm without borders or dividers. The background automatically determines the correct text color and nav style.

Layout & Spacing

Spacing, radius, shadows, and component specifications

06

Layout -

Spacing & Border Radius

Always pick from this scale — never use values in between. Consistency is what makes a design feel finished.

Spacing Scale

4px		Micro gaps — icon-to-text, badge spacing
8px		Small gaps — icon inside button, badge padding
12-16px		Medium gaps — card small padding, eyebrow margin
20-24px		Standard gaps — card inner padding, stat columns
28-32px		Feature & grid gaps — column gap, rule bar margin
36-40px		Page wrap — horizontal padding, all content containers
112px		Section padding — top & bottom of every .sec element
140px		Hero top offset — pushes below 68px fixed nav

Border Radius

Standard Cards

14-22px — Cards, modal panels, info boxes, feature blocks (--r)

Large Cards

20-22px — Large cards, image frames, code windows (--rL)

XL Panels

28-36px — Full-width panels, extra-large section blocks (--rXL)

Pills

9999px — All buttons, badges, chips, tags, pills, rule bars

Small

6-8px — Logo box, icon container, nav logomark, inline code badge

Layout - Shadows & Components

Elevation & Shadows

SHADOW	CSS VALUE	USE IT FOR...
Resting	0 4px 20px rgba(40,20,10,.07)	Nav bar on light, cards at rest — barely perceptible
Elevated	0 8px 32px rgba(40,20,10,.10)	Sticky elements, floating panels, filter bars
Hover	0 8px 40px rgba(40,20,10,.13)	Cards on hover — always paired with translateY(-6px)
Btn Light	0 12px 32px rgba(107,76,76,.35)	Primary button hover in light mode — warm brand glow
Btn Dark	0 12px 32px rgba(201,106,90,.40)	Primary button hover in dark mode — rose glow

Card — Light

bg **rgba(255,255,255,.85)** · no border · radius 22px · shadow resting · hover: translateY(-6px) + elevated shadow

Layout - Social Media — Static Creative

To ensure brand consistency and visibility across all social media creatives, follow these layout rules precisely. Logo placement, size, padding, and font size are non-negotiable minimums.

Rules

- **Logo Placement:** Always at the top of the creative in a prominent position for better visibility and brand recall.
- **Logo Size:** Never smaller than **160px** in width to maintain clarity and legibility.
- **Padding:** Minimum **70px** on all four sides to avoid crowding and ensure balance.
- **Font Size:** Minimum **34px** to guarantee readability across screen sizes and platforms.
- **Labels** (e.g. "Live Webinar") and **Designations:** Min **24px**, max **26px** — keeps hierarchy balanced without competing with headlines.

ELEMENT	SPEC
Logo width	160px minimum
Padding (all sides)	70px minimum
Main font size	34px minimum
Label / Designation	24px min · 26px max

Padding Diagram

Layout —

Social Media Static — Example Creative

The example below shows a real Lyzr social media creative following all static layout rules — logo placement, padding, font hierarchy, and label sizing.

LYZR × AWS — LIVE WEBINAR BANNER

- 1 Lyzr + AWS logos centred in frosted card — logo width $\geq$ 160px
- 2 **Playfair Display** headline "No More Pilots!" — dominant hierarchy
- 3 Italic subtext in **DM Sans** — brand-consistent subheading
- 4 **Live Webinar** label top-right: 24-26px DM Sans, brand colour
- 5 Date bottom-left, **Register Now** CTA bottom-right
- 6 Minimum **70px padding** maintained on all four sides

Social Media Static — More Examples

WEBINAR — DARK, CTA

WIDE BANNER — DARK BG, RESOURCE POST (1920 × 1080)

STAT POST — DARK, METRICS

PARTNER — LIGHT, AWS

SPEAKER — LIGHT, EVENT

Layout - Social Media — Carousel

For carousel creatives, follow the same design guidelines as static creatives to ensure consistency in branding and visual hierarchy. All elements such as logo placement, typography, and minimum font sizes remain unchanged. Only padding differs.

Carousel vs Static — Key Difference

RULE	STATIC	CAROUSEL
Padding (all sides)	70px min	90px min
Logo width	160px min	160px min
Main font size	34px min	34px min
Label / Designation	24-26px	24-26px
Logo placement	Top, prominent	Top, prominent

Consistency Rule

Each card in a carousel must follow the same visual hierarchy as the rest — never change logo position, font size minimums, or brand colors between slides in the same carousel series.

Carousel Padding Diagram

Layout —

Social Media Carousel — Example Creative

The example below shows a real Lyzr carousel creative following all carousel layout rules — 90px padding, consistent logo and font hierarchy across all cards.

15 HR AGENTS — CAROUSEL CARD 1 OF 5

- 1 Lyzr logo top-right inside rounded container — width $\geq$ 160px
- 2 White Amber background with subtle grid texture
- 3 Large **Playfair Display** headline in **Ferra accent**
- 4 Carousel pagination dots — active state in Ferra colour
- 5 **DM Sans** body copy — line-height 1.85, left-aligned
- 6 Minimum **90px padding** on all four sides
- 7 URL bottom-left — DM Sans 13px, Warm Muted

Layout - YouTube Thumbnails

Follow these best practices to create clear, engaging, and high-performing thumbnails. Asymmetric padding leaves room for YouTube's UI chrome on the right and bottom.

ELEMENT	SPEC
Padding — Left & Top	100px minimum
Padding — Right & Bottom	160px minimum
Title font	Large · enhanced with arrows, backdrops, or highlights · max 5 words
Subtext font	70px minimum · balanced with title hierarchy
Faces	Use in large size — more relatable and eye-catching
Background	Dark preferred — creates strong contrast and draws attention

Fonts

Primary Font

DM Sans — use for brand consistency across all thumbnails

Alternate Font

DIN Condensed — allowed for thumbnails only, to fit maximum content in less space

Special Use

Other appropriate fonts allowed **minimally** for special characters, emphasis, or highlights. Maximum usage must always be DM Sans or DIN Condensed.

Padding Diagram

Thumbnail Colors

- **Primary color focus:** All thumbnails should prominently feature Lyzr Ferra ■
- **Contrast & depth:** Use shades and tints of the primary color for visual hierarchy
- **Supporting colors:** Orange for alerts, Green for positive/success, used meaningfully

Layout —

YouTube Thumbnails — Example

The example below shows a real Lyzr YouTube thumbnail following all font, colour, padding, and composition rules.

"IS YOUR DATA SAFE?" — YOUTUBE THUMBNAIL

- 1 Dark background (Near Black) — max contrast, draws attention
- 2 **DM Sans Bold** title with cream highlight strip — legible at all sizes
- 3 Face large and prominent — relatable, increases CTR
- 4 100px padding top/left · 160px right/bottom (asymmetric)
- 5 DM Sans subtext below title — minimum 70px size
- 6 Orange shield icon — accent colour signals topic clearly

Layout - Deck / Presentation

Follow these rules when producing any Lyzr branded slide deck or presentation. Consistency across slides strengthens brand recognition and keeps audiences focused on the content.

Fonts

Headings & Emphasis
Playfair Display — for all slide titles, section headings, and key highlighted terms

Subheadings & Body
DM Sans — for all supporting text, bullet points, captions, and labels

Color Usage

ELEMENT	COLOR RULE
Headings, Subheadings & Key Points	Use a contrast highlight color to draw attention
Body Text	White or black depending on background — maximum readability
Infographics & Tables	Use Lyzr palette colors; adjust background opacity for clarity

— EXAMPLE CREATIVES

Layout Principles

- Follow a clean layout with **sufficient padding on all four sides** of every slide.
- Maintain consistent alignment — center-aligned or left-aligned — across all slides for easy readability.
- **Suggested layout:** Text on the left, infographics or images on the right. Left-align body text especially for large paragraphs.
- Choose an appropriate layout when showcasing special content or unique elements.
- Avoid clutter — **limit information per slide** and split content into multiple slides if necessary.

DECK BACKGROUND OPTIONS

White Amber

Ferra

Near Black #160F0B

Dark Espresso #1E1610

Layout —

Deck / Presentation — Examples

Real Lyzr branded presentation slides. Cover uses Near Black background with Playfair Display headline. Inner slide uses a two-column layout with text left and infographic right.

COVER SLIDE — DARK BACKGROUND

Near Black bg · Playfair Display title · Lyzr logo top-left · Ferra accent line · DM Sans subtitle

INNER SLIDE — TWO-COLUMN LAYOUT

Dark bg · Pie chart infographic · Playfair title · DM Sans labels · Ferra accent strip at bottom
