

Client Success Stories

LESSON 02 • OVERVIEW — LYZR OVERVIEW & OFFERINGS

What you'll learn

- Analyze real-world case studies of Lyzr deployments in global enterprises.
- Discover how Willis Towers Watson (WTW) put together a retirement advisory solution.
- Examine how Accenture and KPMG leveraged Lyzr to manage procurement and venture capital workflows.

Key concepts

WTW automated retirement advisory services using Lyzr's agentic framework. By deploying agents to retrieve data, perform calculations, and format advisory output, WTW reduced manual turnaround times significantly.

TAKEAWAY

WTW automated retirement advisory services using Lyzr's agentic framework.

Accenture runs over 200 agents on a single corporate venture capital harness. Their custom agentic OS manages multiple enterprise functions, making portfolio evaluation and VC workflows highly scalable and automated.

TAKEAWAY

Accenture runs over 200 agents on a single corporate venture capital harness.

KPMG optimized their procurement lifecycle utilizing Lyzr agent intelligence. The system automates compliance checks, vendor communications, and contract analysis in a single, secure environment.

TAKEAWAY

KPMG optimized their procurement lifecycle utilizing Lyzr agent intelligence.

In Studio

- Review the success slides demonstrating how different enterprise verticals implement agent teams.
- Understand the business value of shifting from manual workflows to agentic execution at scale.

TRY THIS

- 1 Identify an industry-specific workflow (such as customer support, legal checks, or document parsing) that would benefit from a multi-agent system.
- 2 Outline how a 200-agent corporate venture capital setup might distribute responsibilities among specialized agents.
